

TechTrim™ Garage Door Trim Overlays

Technology finally hits home.™

Adding style to overhead garage doors with TechTrim™

From raised or recessed panels to an authentic carriage house look, TechTrim garage door trim overlays allow you to create unique designs on residential overhead doors.

TechTrim overlays offer greater definition and several design profiles specifically for garage doors. Each profile has a reversible finish, with an embossed, natural-looking wood grain pattern on one side and a smooth surface on the other. TechTrim looks just like its natural wood counterpart, yet it's made of durable, lightweight polystyrene.

Pre-Primed. TechTrim is factory-primed on all four sides, providing an excellent surface for paints. One coat of high-quality latex paint is typically all that is needed for finishing.

Won't Absorb Water. Because of its polymer composition, TechTrim repels rain and water, making it impervious to the elements and the damage weather cycles can cause. With TechTrim, paint won't bubble or peel from moisture—and that means years of outstanding performance.

Designed To Last. TechTrim is guaranteed not to splinter, crack or rot. It's insect-proof and resists mold, mildew and fungus. And it's not affected by salt or saltwater.

- Custom profiles and sizes available
- Cuts, shapes, nails, screws, staples and sands like wood
- Holds nails and screws better than wood
- Special profiles, overlaps, can be tongue and grooved

TechTrim™ Dimension Drawings

(Profiles are 75% of actual size)
